

Your eyes have more they want to see

Tips to help with vision

Just a few changes may make a big difference in your daily routine.

Control light, contrast, and glare

- Keep rooms evenly lit, use adjustable lamps for direct light, and use night-lights
- Use contrasting colors around the house—for example, paint doorframes and railings a different color from walls
- Install an interactive device to turn lights on and off, control your thermostat, and more

Take charge of your kitchen

- Create large labels with a bold marker or paint pen to help organize items on shelves and in your refrigerator
- Mark appliance dials with brightly colored stickers or tactile dots

Manage your medications

- Mark pill bottles with differently colored rubber bands or fasteners to help tell them apart
- Use large-print pill boxes

Improve your view

- Read with a magnifying glass, or use your phone's camera as a magnifying glass
- See if large-print materials are available
- Instead of a traditional book, download an audiobook online or from your local library
- Enlarge the type size on your computer, and maximize contrast settings

Stay organized

- Keep commonly used items in the same easy-to-reach places
- Remove clutter, cords, and throw rugs that may be easy to trip on

What to do when you are out and about

- To help reduce glare, wear sunglasses or anti-glare glasses
- Talk to your retina specialist about driving, and avoid driving at night

INDICATIONS

EYLEA® (aflibercept) Injection 2 mg (0.05 mL) is a prescription medicine approved for the treatment of patients with Wet Age-related Macular Degeneration (AMD), Macular Edema following Retinal Vein Occlusion (RVO), Diabetic Macular Edema (DME), and Diabetic Retinopathy (DR).

SELECT IMPORTANT SAFETY INFORMATION

EYLEA is a prescription medicine administered by injection into the eye. You should not use EYLEA if you have an infection in or around the eye, eye pain or redness, or known allergies to any of the ingredients in EYLEA, including aflibercept.

Please see additional Important Safety Information on next page and click for full Prescribing Information.

EYLEA is the **#1 prescribed** treatment in its class FDA approved for Wet AMD, DME, and MEfRVO.*

SAFETY INFORMATION FOR EYLEA

IMPORTANT SAFETY INFORMATION AND INDICATIONS

- EYLEA® (aflibercept) Injection is a prescription medicine administered by injection into the eye. You should not use EYLEA if you have an infection in or around the eye, eye pain or redness, or known allergies to any of the ingredients in EYLEA, including aflibercept.
- Injection into the eye with EYLEA can result in an infection in the eye and retinal detachment (separation of retina from back of the eye) can occur. Inflammation in the eye has been reported with the use of EYLEA.
- In some patients, injections with EYLEA may cause a temporary increase in eye pressure within 1 hour of the injection. Sustained increases in eye pressure have been reported with repeated injections, and your doctor may monitor this after each injection.
- There is a potential but rare risk of serious and sometimes fatal side effects, related to blood clots, leading to heart attack or stroke in patients receiving EYLEA.
- The most common side effects reported in patients receiving EYLEA were increased redness in the eye, eye pain, cataract, vitreous (gel-like substance) detachment, vitreous floaters, moving spots in the field of vision, and increased pressure in the eye.
- You may experience temporary visual changes after an EYLEA injection and associated eye exams; do not drive or use machinery until your vision recovers sufficiently.
- Contact your doctor right away if you think you might be experiencing any side effects, including eye pain or redness, light sensitivity, or blurring of vision, after an injection.
- For additional safety information, please talk to your doctor and see the full Prescribing Information for EYLEA.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.
