

## Permission Requirements for Uploading Selected Video From Regeneron

The included video can be shared with your patients, either in your office during a visit, or on your office website. For posting to your website, please note the following.

If you have an outside agency or an internal website manager that handles your site updates, send this entire zip file over to them and let them know where you want it posted. They should be able to take it from there.

If you make your own site updates, you can post the video using your normal methods of uploading to your site. Unfortunately, there are too many possible ways to upload video to a website to include specific instructions here.

### Permission Requirements:

- Include the full **Video Title** as it appears on the Resource Center page, as well as the following **contextual information** in close proximity to the video:
  - This video is provided by Regeneron and is for general educational purposes only. To learn more about EYLEA® (aflibercept) Injection, please talk to your healthcare provider. For a copy of the full Prescribing Information, [click here](#).
- The video and accompanying text **cannot** be altered in any way.
- Any questions about usage should be directed to Regeneron at [www.regeneron.com/contact](http://www.regeneron.com/contact).
